**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Brisk northeasterly winds will make it feel unseasonable cold on the higher routes during the early hours and at first Saturday morning. UV levels will be moderate, so sun protection is advised if venturing out for a prolonged period.

Forecast for Sunday 04 Apr 2021

Weather: A dry, frosty start to the morning with some short lived shallow fog patches under clear skies in some valleys. Staying dry with long sunny spells through the day, but clouding over during the evening with patchy rain arriving in the north around midnight.

Maximum wind: West 15-20mph increasing to northwest 30mph gust 40 mph in the evening.

Chance of cloud free mountain/hill tops above 600m: 100% during daylight hours, but becoming 20% or less late evening as cloud thickens and lowers from the north.

Visibility: Generally very good or excellent during daylight hours following the clearance of any early valley fog. Deteriorating in the evening as rain arrives with cloud lowering to widely 500-700m by late evening.

Temperature: **Valleys:** Minus 1 Celsius becoming plus11 Celsius.
At 600m: Plus 2 Celsius becoming plus 4 Celsius.
Freezing level: 800m rising above the summits.
